

inline skating chassis

SOUL PLATE MODIFICATION (TEMPLATE)

1. Print at 100% Size On 8.5" x 11"
2. Remove soul plate from boot.
3. Slice template on dotted lines.
4. Insert ufs bolts through openings for alignment to soul plate.
5. Slice on dotted lines for area coressponding to chassis wheelbase length:
Oysi Inline Skating Chassis - 281mm
6. For compatibility with all sizes of chassis, slice on on dotted line and remove larger area of material.
7. Mark area on soul plate for material removal, remove template, and carefully remove material from soul plate.

Note: Material does not have to be removed completely through the soul plate, just enough for the wheel to roll freely.
